EXPERIENCE

Founding Team Member	September 2025 - Present
NuviBrainz	Remote
- Designed and implemented a structured data pipeline to transform unorganised JEE question bank data into normalized JSON schemas, enabling efficient storage, retrieval, and feature expansion. - Built automated workflows for data cleaning, validation, and formatting, reducing manual processing overhead and significantly improving quiz creation speed. - Enabled scalable quiz generation architecture, supporting rapid iteration and seamless handling of large question sets, leading to sustained engagement from 100+ weekly active users.	

PROJECTS

Zomato Dataset Analysis (Github)	April 2026
- Performed data cleaning and EDA to analyze customer behavior, restaurant trends and pricing patterns. - Built interactive Tableau dashboards to visualize key insights like ratings, cuisines, and cost distribution. - Derived data driven insights to support business decision making and improve understanding of market trends. Tech Stack: Python, Pandas, NumPy, Tableau	
Customer Churn Analysis (Github)	January 2026
- Analyzed 30K+ customer records to identify high-conversion segments and optimize marketing campaign performance. - Cleaned and transformed data using Google Sheets functions (ARRAYFORMULA, COUNTIFS, AVERAGEIFS) and structured categorical variables. - Built pivot tables and dashboards to evaluate conversion trends across demographics, call duration, and campaign metrics. - Identified key drivers of customer conversion, enabling data driven strategies to improve campaign ROI and targeting efficiency. Tech Stack: Google Sheets, Pivot Tables, COUNTIFS, Data Visualization	

CERTIFICATIONS
