PROFESSIONAL SUMMARY

Data Analyst and Full Stack Developer with hands-on experience in Python, SQL, and data visualization. Proficient in cleaning and processing real-world datasets of 10K+ records, performing EDA, and delivering actionable insights via interactive dashboards built on Tableau and Looker Studio. Experienced with Google Sheets and Excel for structured data reporting. Passionate about building scalable, data-driven solutions that solve tangible business problems.

EDUCATION

Bachelor of Technology (Data Science)

Newton School of Technology , Rishihood University

2024 - 2028

Grade: 7.0/10.0

Intermediate (Class XII)

Delhi Public School Varanasi

2022 - 2023

Grade: 84.4%

Matriculation (Class X)

Delhi Public School Varanasi

2020 - 2021

Grade: 80.0%

EXPERIENCE

Co-Founder

VELLAVIBE

June 2025 - Present

REMOTE

I started **VELLAVIBE** { [vellavibe.com](#) } – a contemporary clothing brand that celebrates creativity, comfort, and self-expression.

Building something from the ground up has been an incredible journey, from designing our first collection to launching our online store.

We're passionate about crafting styles that feel good and look great – and this is just the beginning.

PROJECTS

Zomato Analysis ([Github](#)) ([Demo](#))

April 2026

Zomato Analysis — Restaurant Data Analysis

- Collected and analyzed a real-world Zomato dataset containing 10K+ restaurant records across multiple Indian cities.
- Performed advanced data cleaning and preprocessing using Pandas and NumPy, resolving missing values, duplicates, and inconsistent categorical labels.
- Conducted detailed Exploratory Data Analysis (EDA) to identify key factors influencing restaurant ratings, cost distribution, and cuisine popularity.
- Built multiple visualizations (distribution plots, heatmaps, and comparative charts) using Matplotlib and Seaborn to uncover hidden patterns in customer preferences.
- Developed an interactive Tableau dashboard to visualize restaurant density, pricing trends, and rating clusters for intuitive business insights.
- Derived actionable insights such as high-demand cuisines, optimal pricing ranges, and locality-wise performance trends to support data-driven decision-making.

Crime Forecasting Analysis Vancouver ([Github](#)) ([Demo](#))

February 2026

Project: Crime Data Analysis – Vancouver

- Collected and analyzed real-world crime dataset from **Vancouver** to uncover patterns and trends
- Performed **data cleaning and preprocessing** (handled missing values, duplicates, and inconsistent formats)
- Conducted **exploratory data analysis (EDA)** to identify crime hotspots, seasonal trends, and category distributions
- Built an interactive **dashboard using Looker Studio** for visual insights
- Visualized key metrics like crime frequency, location-based analysis, and time-based trends
- Derived actionable insights to support better understanding of crime patterns

SKILLS

Computer Languages: Python, TypeScript, HTML, CSS, JavaScript, SQL

Data Tools: NumPy

Software Packages: Pandas, Matplotlib, Express JS, Tailwind, Prisma ORM, React, Node.js, MySQL, MongoDB

Additional Courses: Data Structure

Others: Tableau, Sentry, Git and Github, Entrepreneurship, OAuth 2.0

EXTRA-CURRICULAR ACTIVITIES

- Participated in college events (DAMRU FEST) as contestent in a play.
- Represented my school in **CBSE CLUSTER FOOTBALL Tournament**
- Participated in **Hackathons like SIH and university internal Hackathon**
