PROFESSIONAL SUMMARY

I'm Tanish from Rewari, Haryana

EDUCATION

Bachelor of Technology (Computer Science)	2024 - 2028
Newton School of Technology, Rishihood University	Grade: Pursuing
Intermediate (Class XII)	2022 - 2023
Navyug Convent School	Grade: 74.0%
Matriculation (Class X)	2020 - 2021
R.P.S Public School	Grade: 91.8%

EXPERIENCE

MRA	January 2025 - Present
Aaditya Birla Capital	<i>Sonipat</i>
Helped clients with wealth planning, insurance mapping, and long-term financial safety. Closed policies worth Rs.1L+ and becoming the MRA.	

PROJECTS

DSA Planner (Github) (Demo)	March 2026
StudyOS — AI-Powered Adaptive DSA Learning Platform	
- Built a full-stack MERN application that acts as a personalized DSA tutor, combining RAG-based AI explanations, adaptive quiz + coding challenges, and an intelligent study planner - Implemented a RAG pipeline using OpenAI embeddings + ChromaDB vector store to retrieve context-aware answers with confidence scoring and source citations - Engineered an adaptive difficulty engine that adjusts problem difficulty in real time based on accuracy, speed, and streak — independently per DSA topic - Integrated a Monaco Editor-based coding environment with AI-powered code evaluation, test case validation, and optimal solution feedback - Built a progress intelligence dashboard with a 13-topic mastery heatmap, weak area detection, and performance trends across both quiz and coding attempts - Developed an AI planner agent that generates personalized day-by-day study plans with spaced revision cycles and mock test scheduling based on user deadline and weak topics - Designed a streaming chat interface with SSE (Server-Sent Events) delivering token-by-token LLM responses with real-time citation rendering	
Tech: React, Node.js, Express, MongoDB, ChromaDB, OpenAI API, JWT, Tailwind CSS, Monaco Editor	
Medicare (Github) (Demo)	November 2025
MediLink – Online Appointment Booking System	
Full-stack : Frontend and backend integration Authentication Systems: JWT implementation and security Database Design: Schema design and data relationships API Development: RESTful API design and implementation Modern React: Next.js App Router and React Hooks Deployment: Cloud hosting and CI/CD pipelines	

SKILLS

Computer Languages: Python, TypeScript, NoSQL, HTML, CSS, JavaScript, SQL

Data Tools: PostgreSQL

Software Packages: Windows, Express JS, Tailwind, Next.js, Next JS, Prisma ORM, React, Node.js, MySQL, MongoDB

Soft Skills: Team Building, Time management, Decision-making, Creativity, Teamwork, Responsibility

Others: Git and Github, UI/UX, GenAI, OAuth 2.0

EXTRA-CURRICULAR ACTIVITIES

- Sports - College Basketball Team Caption,
Won Multiple intercollege Basketball tournaments.
- Team Building and Management.
- Financial Planning and Wealth Creation
- College Tech Fest Organizing committee member.
